

TrackM2M-VisTracks Certifying Statement of FMCSA Regulation Testing

The TrackM2M-VisTracks ELD was certified through successful execution and verification of the FMCSA ELD Test Procedures. The TrackM2M-VisTracks ELD was installed on various types and sizes of Android and Apple phones and tablets. Testing was performed through the use of a J1939/J1708 simulator and actual vehicles while having been connected to the Geometris whereQube 84 Series engine connected device. A few of the test procedures, which are relevant to Motor Carriers, were verified through the use of the Hours of Service web application (portal) that can be accessed through a web browser.
